

HONEYWELL F111 Ceiling-Mounted Commercial Media Air Cleaner

APPLICATION

The F111 Ceiling-Mounted Media Air Cleaner is designed for use in commercial applications that require the removal of airborne particles and odors. Typical applications include restaurants, bars, schools, etc.

The F111 uses a single-speed, direct-drive, forward curve blower motor with a 95% Di-Octyl Phthalate(DOP) particle or High Efficiency Particulate Arrestance (HEPA) filter, which provides high efficiency removal of particulates. When equipped with CPZ™ modules, the F111 also removes Volatile Organic Compounds (VOCs) and odor.
