

# ***ZeoPro™***

*Using Space Age Technology to Improve Horticulture and the Environment*

**The National Aeronautics and Space Administration (NASA), has developed a new kind of growth media for plants (called zeoponic materials) that carries within itself the nutrients needed by the plants and provides those nutrients in a very efficient manner.**

**ZeoponiX holds exclusive rights to the NASA patents and is working hard to make the benefits of this new technology available right here on earth.**

**ZeoPro is a fertilizer and soil amendment that you add to other growth media to improve how they hold and deliver nutrients and water.**
